The dealing on 'change yesterday was a repetition, with slight variations, of what has been done day by day throughout the week, and, taken from any point of view, the good that the exchange is daily accomplishing cannot be overestimated. The interest taken in the daily transactions on the board seems unabated, and front seats in the lobby are siways at a premium.

The week, from a financial point of view, shows a decided gain over the dealings of the week before, as the sale of several of the leading stocks were chronicled, including Ontario, Mercur. Mammoth, Sunshine and Utah.

Mercur stock slowed a decided gain over last week, and as the company pays a dividend tomorrow, it will in all likelihood climb still higher, espec-ially as the present management of the property will unionbeedly be unani-mously continued by the stockholders' meeting, which will be held Monday afternoon.

afternoon.

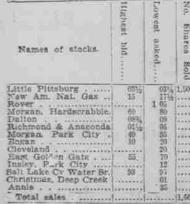

The dealings in Gae was especially large during the week, which was owing very largely to the expected change in the management of the company at the stockholders' meeting, which was held yesterday, and also on account of facturable news regarding the holdings of the company.

Dalton was also active for the same reason and will doubtless be in de-

reason and will doubtless be in de-mand until after the annual stockhold-ers' meeting which occurs on the fist. The transactions yesterder were as
